

Cactus, Vistar to Integrate with CredSimple

A Seamless Credentialing Experience

Cactus and Vistar have partnered with CredSimple, an NCQA-certified CVO, to create a seamless integration so that users — with the simple click of a button — can instantly and securely pass provider information to and from CredSimple for credentialing and re-credentialing.

Unlike legacy CVOs, CredSimple offers a technology solution that replaces the monotonous primary source verification work required for compliant credentialing with automation, transforming the credentialing function into a fast, compliant and cost-effective process for healthcare organizations who are dissatisfied with inefficiencies that lead to burned out employees, dissatisfied providers and missed business opportunities.

Key Benefits

Process Efficiency & Speed

- 5-day average turnaround on thousands of files
- The elimination of expediting fees
- Increased credentialing throughput without added effort, extra OT expense or employee burnout
- Built-in application validation for providers who use the CAQH application
- Integration with your provider management platform saves time and reduces manual work

Compliance

- NCQA compliance burden is on CredSimple
- Ongoing monitoring

Great For:

- Health plans, medical service organizations, ACOs, IPAs, ASCs who want to outsource primary source verification and ongoing monitoring
- Organizations with backlogs or those preparing for a credentialing surge (i.e., plans preparing for open enrollment or provider organizations with a large influx of hires)
- Delegated entities whose health plans adhere to NCQA standards
